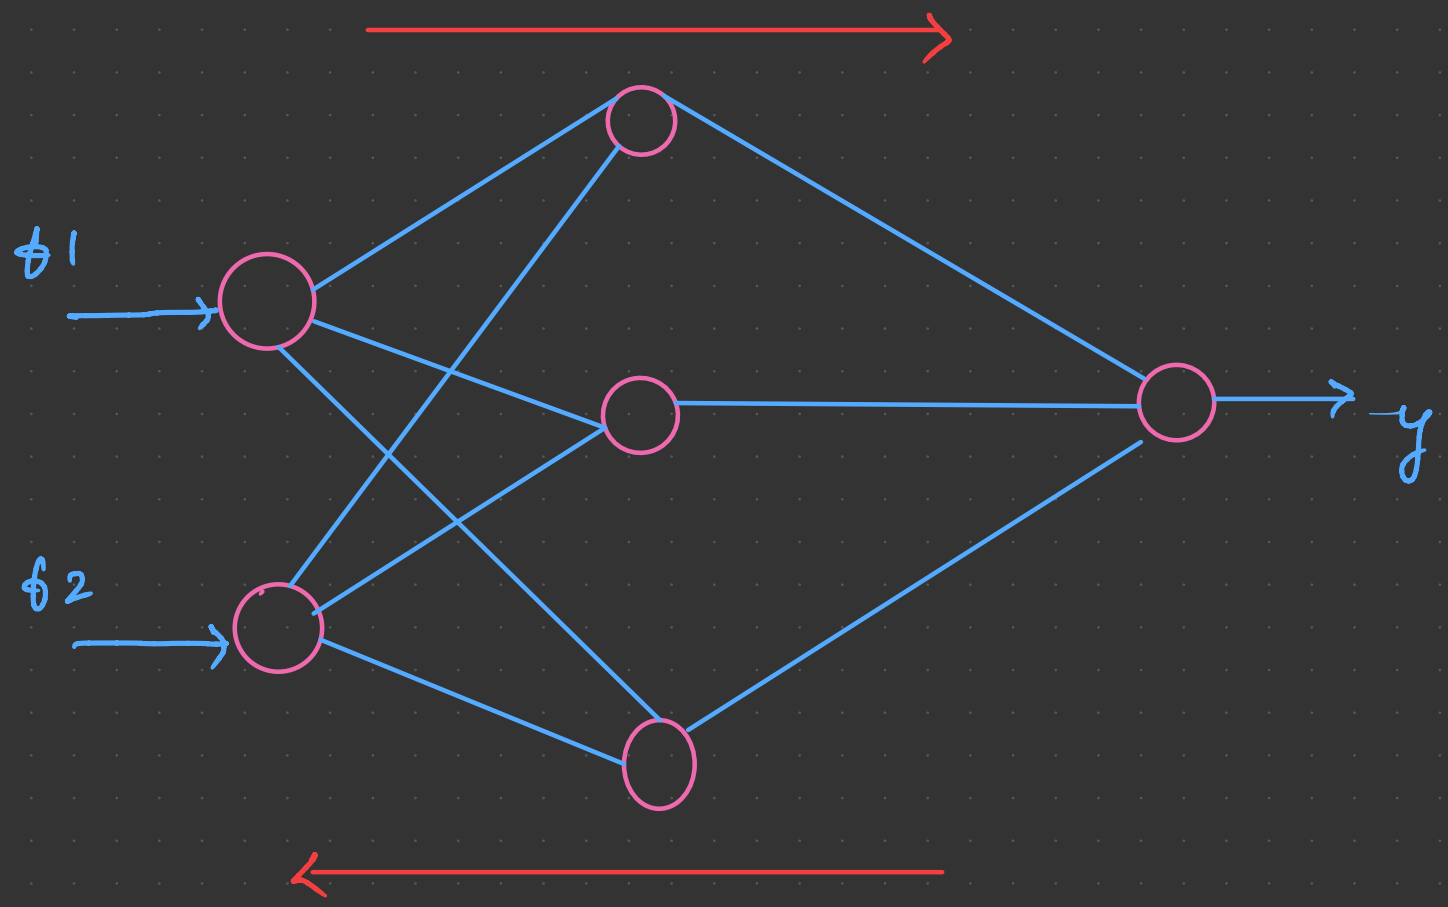
NLP In Deep Learning

example

ANN

house price prediction

f_1	f_2	$y \rightarrow$ o/p
house Size	No. of Rooms	price



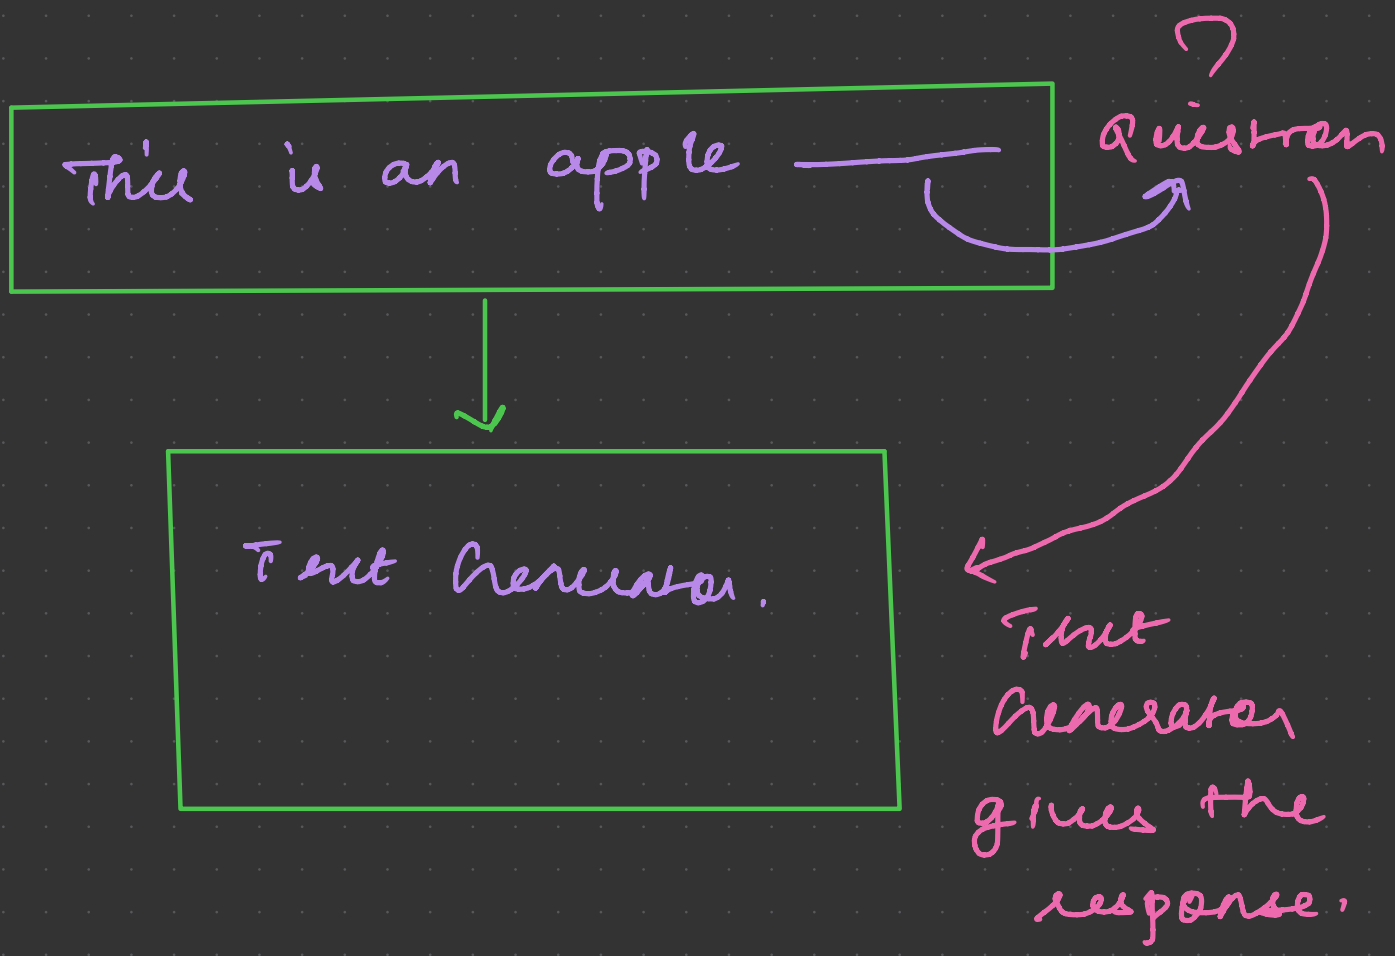
In ANN → sequence of data does not matter.

CNN

here the data can be in the form of Image, video frames.

Sequential Data

→ Text generation



→ Chat bot Conversation

Q & A → Question → Answer.

What is sequential Data.

example:

The food is good

The ordering of the sequence is important. If the order changes the meaning of the sentence may also change.

→ Language Translation

example

English → French.

here also sequence is important.
